November 18-22, 2013

Program Objectives

Enterprise Transformation & Integration: Beyond IT/Business Alignment will help you create the foundation for an enterprise framework that captures the current state, envisions the future state, and determines actions needed for guiding integration and transformation efforts. The program covers how to use current theory and research, leading-edge industry experience, and proven best practices and techniques in order to develop a roadmap for effective and sustainable organizational integration and transformation.

Who Should Attend

This program is designed for CIOs; EVPs; senior strategists, senior IT managers; enterprise, business, and technical architects; business and IT strategists, enterprise transformation analysts, enterprise portfolio managers, supply chain professionals, and others with strategy and leadership responsibilities in their organization.

Program Benefits

Enterprise Transformation & Integration will improve your ability to:

- Help the enterprise develop and articulate actionable strategic plans
- Remove the barriers caused by trying to just “align IT with the business”
- Define and design competitive organizational strategies and architectures
- Analyze and define effective extended enterprise and supply chain architectures
- Communicate the value of adaptive enterprise architecture to organizational leadership
- Form a common architecture vision among lines of business and IT
- Create an effective enterprise architecture discipline to drive higher organizational value

- Gain insight into far-reaching technological and business changes that are transforming inter-business relationships
- Respond to new business challenges and technical complexity in the face of heightened time and budget constraints

Program Content

This unique program combines top faculty leaders from Penn State and other leading institutions, including a business-technology expert from Gartner, the world's leading provider of IT research and consulting. Content covers:

The Evolving View of the Strategic Alignment of Business and IT

- Understanding the pitfalls of traditional alignment thinking
- Understanding organizational architectures for enterprise integration and transformation
- Understanding value and business outcomes

Strategic Leadership for Integration and Transformation: Assessing Your Challenge

- The organizational challenges
- Organizational culture and competitiveness
- Life-cycle dimensions of organizational culture
