MIT
SUPPLY CHAIN
Excellence
 AWARD

The MIT Supply Chain Excellence Award is given annually at Penn State to the most outstanding graduating senior supply chain major.

The award entitles the winner to a tuition scholarship of \$20,000 towards the MIT Supply Chain Management (SCM) Master's Degree Program.

The award is restricted to US Citizens. To use the scholarship, the winning student is required to apply and be accepted into the MIT SCM program. Although the SCM program requires 2-5 years of work experience, the winner (and other talented students) can apply to the MIT SCM program immediately for admission with deferred enrollment, or wait until they have worked for two to five years before applying. The scholarship offer expires after 5 years.

Finalists for the MIT SC Excellence Award will be contacted by the Penn State supply chain faculty and asked to submit a resume, transcript and a short essay. The final selection will be made jointly by Penn State and MIT. Announcement of the winner is made shortly prior to Penn State's graduation ceremony.

 MANAGEMENT

**YOUR CAREER IN
 SUPPLY CHAIN**

About the MIT Supply Chain Management Program

The MIT SCM Program is designed for early career supply chain professionals who wish to go back to school to receive advanced training in supply chain management. This is an intense 10-month study program that includes coursework, a company-sponsored thesis project, and international travel to one of MIT's SCALE centers in Europe, South America, or Malaysia. The SCM program enables young professionals to obtain higher-level, more interesting jobs and receive a significant boost in salary average of over 70%.
